DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-31, drawn to a field effect transistor, classified in class 257, subclass 213+.
- II. Claims 32-38, drawn to a method of fabricating a field effect transistor, classified in class 438, subclass 149+.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of the group I invention would not necessarily imply unpatentability of the group II invention, since the transistor of the group I invention could be made by processes materially different than those of the group II invention, for example, rather than applying a pattern to the host structure including the engineered array of dopant atoms, the epitaxial film and the dielectric layer to define the final shape of the transistor, the epitaxial film and the dielectric layer could be selectively formed and/or the selectively formed dielectric layer and epitaxial film

Art Unit: 2822

could be used as a mask to pattern the host structure including the engineered array of dopant atoms.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Drawings

The drawings filed on August 14, 2003, are acceptable.
